Mobility

Get Mobile Experienced with Dialogic!

Dialogic® technology has been enhancing our customers' mobile experience since the inception of cellular communications. Dialogic can help position you to succeed in delivering services in today's communications market, even as the mobile experience evolves and advances. Here's what we can offer you:

Transform mobile networks through our gateway products and our Mobile Value-Added Service Innovation Platforms. Dialogic technology has enabled the creation and deployment of countless mobile value-added services around the world, including video-based value-added services

Connect networks through our session border controller solutions and our softswitch solutions. Our SBCs help smoothly and securely move voice, video and data between the many types of IP and TDM networks in use today, including advanced mobile networks. Our ControlSwitch System provides support for TDM and IP traffic, including mobile IP traffic, and is designed for cost-effective scalability and configuration flexibility, allowing service providers to create a comprehensive solution portfolio.

Optimize mobile networks through our bandwidth optimization solutions that can achieve up to 50% mobile bandwidth savings, and via our VisionVideo Software Solution that measures and tracks mobile video quality as perceived by the end user.

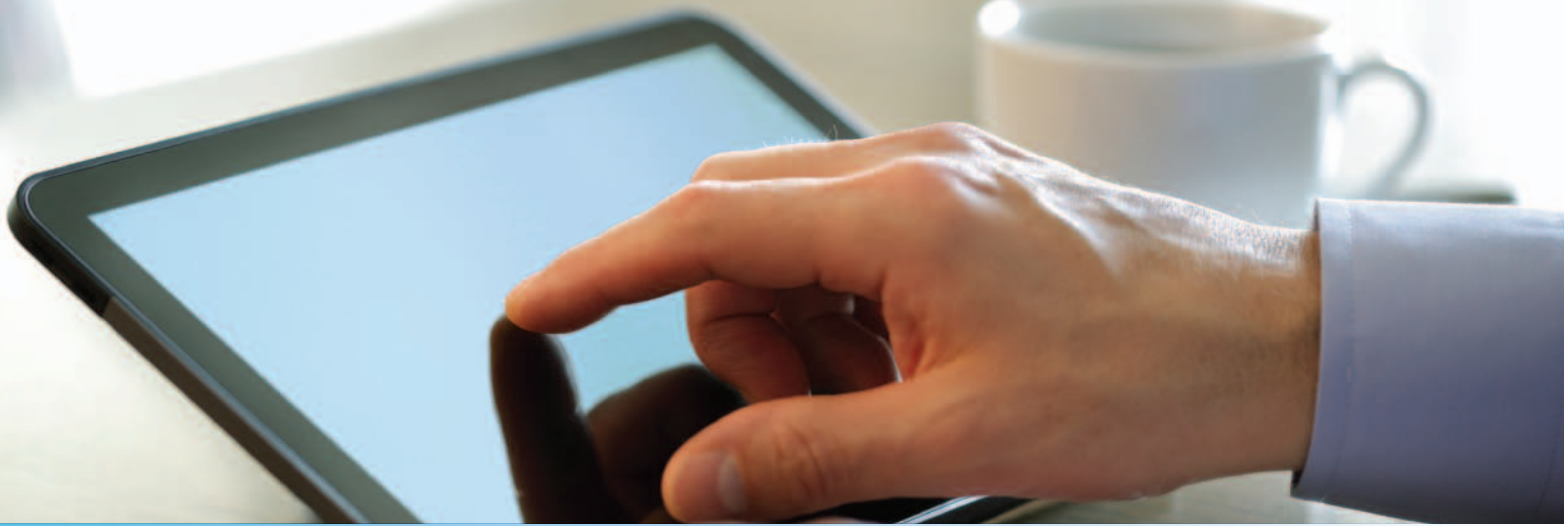

Dialogic Solutions

Dialogic enables a range of communications solutions, including:

Mobile Value-Added Services: Customers are looking for more innovative services, including video, voice, location-based services and commerce transactions. Service Providers want to deliver these value-added services to create additional revenue streams, while at the same time improving user experience and retaining their existing customers. Dialogic provides media and signaling building blocks with modern interfaces to support rapid value-added-service delivery for both consumer and business applications. Additionally, our gateways and session border controllers, offering a range of connectivity and security options, can complement your solution and make it truly integrated.

Efficient Mobile Network Infrastructures: An unprecedented number of both wireless and wireline networks of different types with different interconnectivity requirements and continually changing standards are being counted upon to deliver more and more voice, data and video. Dialogic's softswitch, SBC, bandwidth optimization and gateway solutions enable customers to leverage their current wireless and wireline infrastructure and networks, while also supporting the delivery of new mobile revenue-generating services. From switching to transport to service creation, Dialogic supplies technology to create, manage, control and optimize voice, video and data sessions simultaneously.

Cloud Communications: Voice over IP, hosted PBX and Unified Communications that require voice, fax, video and data are moving to the cloud, and subscribers are accessing these services via mobile devices. Other services now in “the cloud“ include contact centers, Interactive Voice Response, outbound notification, audio and video conferencing, and Mobile Value-Added Services. Dialogic can enable cost-effective cloud-based communications services as alternatives to premise-based services with our media processing and gateway products that are field-proven for reliability and easy scalability and which support advanced features such as video and High Definition (HD) voice.

Video Quality of Experience: Mobile video can represent a significant revenue enhancement for service providers and content delivery networks (CDNs). Dialogic is enabling the next generation of video services via cutting-edge software for measuring quality and hardware for cost-efficient, optimized video delivery, helping to provide a more satisfying user experience.

Business Productivity and Efficiency: Whether you are looking for Contact Center Solutions, Unified Communications, Unified Messaging, Fax Over IP or SIP Trunking, business communication solutions built on Dialogic® products allow service providers and enterprises to help their customers increase productivity and efficiency.

Solution Showcase

The Solution Showcase features market-tested, revenue generating solutions for service providers and enterprises. Each solution is recognized for its innovative nature as well as its market-proven reliability, ease of deployment, and scalability. The Showcase highlights a broad range of network-based solutions, including 3G video call intercept designed for law enforcement agencies, location-based services that help friends and family members keep track of one another, real-time video conferencing services, cloud-based PBX services, mobile banking and mobile entertainment solutions.

Dialogic Services and Training

Our Services group offers world-class, expert support programs with a global reach. Customers can choose from an array of contracts and support levels, and are able to call upon a seasoned team with a proven track record and unparalleled product knowledge. Extensive free online support is also available.

Experienced trainers present a wide variety of programs on Dialogic products. Customers can begin with free online training courses and progress to classroom instruction, webinars, and hands-on training at Dialogic sites, as well as request custom training.
