

New Product Introduction

Field Upgrade Kits - Dialogic® Digital Signal Processing Series 2 Plus (DSP2 Plus) Module and Dialogic® IP Network Interface Series 3 (IPN3) Module

Dialogic is pleased to announce the introduction of two new field upgrade kits for the Dialogic® Converged Services Platform (CSP) family:

1. Field upgrade kit for DSP2 Plus module
2. Field upgrade kit for IPN3 Module.

The field upgrade kits provide added flexibility in managing deployed systems by allowing customers to increase the capacity of the DSP2 Plus and the IPN3 cards on site where their system is deployed. The kits also expedite the upgrading process by eliminating the need to ship a DSP2 Plus or IPN3 card to a Dialogic facility to be upgraded. With the kits, customers will be able to more easily upgrade their systems as they grow, on their schedules, and in the specific sites where they need extra capacity.

The DSP2 Plus module is compatible with the DSP2 Plus motherboard. It is not supported on the DSP2 motherboard, which was announced as “end-of-life” in December, 2007. The DSP2 Plus motherboard and module are supported on Dialogic® CSP System Software Release 8.3.11 and later.

The IPN3 module is compatible with the IPN3 motherboard. It is not supported on the IPN2 motherboard, which was announced as “end-of-life” in February, 2008. The IPN3 card is supported on Dialogic® CSP System Software Release 8.4.1 ER-3 and later.

The field upgrade kits contain the parts that are required for upgrading, including: one module (a DSP2 Plus or IPN3 module, depending on the ordered kit), an installation guide, and 4 (four) mounting screws.

The table below lists the new model numbers and their availability:

NEW PRODUCT DETAIL		
<u>Model Number</u>	<u>Product description</u>	<u>Availability</u>
CSP-DSM-1400R	Field upgrade kit for DSP2 Plus module	Now
CSP-IPM-3000R	Field upgrade kit for IPN3 module	Now
