Handling and Recycling of Dialogic Products

As noted above permitted restricted substances are used in Dialogic products, albeit below the level permitted, these substances are integral to the products and are not consumed or released during use. The products may be handled safely during use by following general good practice when working with electronic equipment.

When this product is no longer required, or is damaged while is service it should be recycled and not disposed of in the general municipal waste stream.

Some server products use lithium batteries (Type CR2032), in the unlikely event that one will need to be replaced, the battery should be recycled and not disposed of in the general municipal waste stream. Please use locally available recycling facilities, this prevents restricted substances entering the natural environment. Your local city council will advise you on these recycling services.

People's Republic of China

Dialogic products shipped directly to the People's Republic of China after March 1, 2007 comply with the applicable environmental substance regulations detailed in the 'Administrative Measures on the Control of Pollution Caused by Electronic Information Products' (Ministry of Information Industry Order #39). Products may use restricted substances above the limits specified in GB/T 26572-2011 [SJ/T 11363-2006] (Requirements of concentration limits for certain restricted substances in electrical and electronic products). Please see the declaration in the table below which has been prepared per SJ/T11364-2014 (Marking for the Restricted Use of Hazardous Substances in Electronic and Electrical Products). Products carry a label indicating the Environmental Protection Use Period – typically 10 years.
